Spectacular Sliders

Your home is an expression of your personal style. The doors you pass through in your everyday life should be part of that expression. If indoor/outdoor living is your desire, AG Millworks will help you achieve a quality point of view. Express yourself architecturally with countless configurations of door systems that slide or lift and slide to expand your living space and lifestyle. Fine craftsmanship combined with advanced technology ensures a perfect fit and finish when your project is complete. Sliding patio doors are great space saving option, stacking behind each other on one side of an opening or into a pocket concealed in the wall.

Multi-Slide doors glide past each other like lift and slide doors, but do not require the rotation of a handle to operate. The wheels are always engaged, ready to roll and are a practical, cost-effective solution for most openings. Open up a wall by sliding them into pockets or stack them in front of each other on one side of the opening.

Lift & Slide doors feature European engineering that enables you to slide even the most massive doors with incredible ease, opening entire walls with the turn of a handle. As you rotate the lever, a concealed full length gear system activates the wheels and elevates the sliding door panel. The door can be smoothly rolled from side to side. To close, simply rotate the lever and feel the wheels smoothly retract as the door settles onto the track. The multi-point lock engages with authority. Our optional nesting lift and slide handle set rests flush with the face of the door and folds neatly away to allow the doors to pocket without needing a removable handle.

1 | 43 ft wide by 9 ft tall - 8 panel pocketing Lift & Slide door.

Sill Options*

Sliding door systems come standard with our SILLution sliding door threshold made from heavy duty extruded aluminum for smooth operation and easy up-keep. Available in Clear Anodized and Bronze Anodized finishes, the SILLution threshold provides a flat and smooth surface for doors.

*1/4" high Stainless Steel Recessed track system is also available at an upcharge. This sturdy track system lives underground, so there is no raised sill to step over.

Wood Species

Our doors are available in 18 different wood species including:

- Clear Alder • Knotty Alder • Paint or Stain Grade V.G. Douglas Fir/Pine
- Walnut • Cherry • African Mahogany • Sapele Mahogany • Sipo Mahogany
- Genuine Mahogany • North American Red Oak • Quarter Sawn Red Oak
- North American White Oak • Quarter Sawn White Oak
- Rift Sawn White Oak • Clear Cedar • Knotty Cedar

Clad Colors

When exposure to sun and rain is an issue, opt for Aluminum Clad/Wood Patio Doors. We combine a sleek, tough, low maintenance exterior of 1/16" thick extruded aluminum with a rich, warm all wood interior to give you the best of both worlds.

1 | Our standard colors

Carbon (Black) Espresso Brown Sandcastle Tan Linen White Clear Anodized

2 | Hundreds of custom colors available. Upcharge applies.

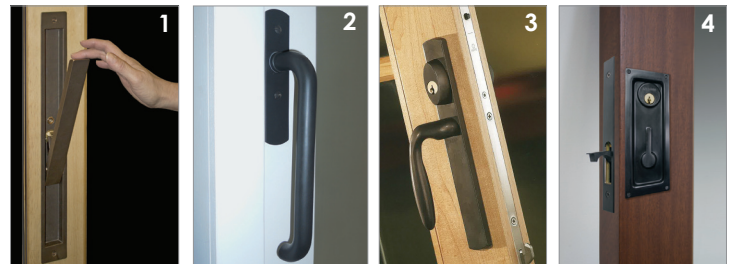

Actual colors may vary.

Handle Sets

Stunning doors deserve stunning hardware. We offer an array of styles and finishes, from traditional to modern, tasteful and refined to complement any decor. Well designed for ease of use with durable craftsmanship for long lasting quality.

- 1 | Nesting Lift & Slide Handle Set 2 | Standard Lift & Slide Handle Set
